Project Overview

The HR dashboard was developed to monitor employee performance indicators and identify workforce challenges affecting business operations — helping management move from assumptions to data-driven decisions.

Employee Population

Total headcount and distribution

Staff Exits & Attrition

Turnover tracking and trends

Department Distribution

Workforce across units

Gender & Age Analysis

Demographic breakdown

Employee Location Trends

Geographic workforce spread

Problem Statement

NICON Bank is experiencing an attrition rate of **20.5%** with **41** employee exits.

Impact of High Staff Turnover:

Reduced Productivity

Increased Costs

Loss of Talent

Staff Pressure

Management needs to understand where the problem exists and how to reduce it.

Project Objectives

01

Track Headcount & Exits
Monitor employee population and
staff departures

02

Identify High-Attrition
Departments
Pinpoint units with elevated
turnover

03

Analyze Demographics
Study distribution by age, gender,
and location

04

Assess Workforce Stability
Understand retention risks across the organization

05

Recommend Retention Strategies
Propose actions to improve employee retention

Executive Summary

The dashboard shows **200 employees** with **41 exits**, resulting in a **20.5% attrition rate** — revealing urgent need for retention strategies.

20.5%

Overall Attrition Rate

These metrics provide a quick picture of workforce health and stability.

Key Insights

Department Risk

- 1 Sales has the highest attrition rate despite the lowest employee count — a strong retention problem.

Workforce Concentration

- 2 Operations has the largest workforce, making workforce planning here critical.

Age Group Concern

- 3 Employees aged 50+ show the highest attrition, suggesting retirement or disengagement risk.

Gender Pattern

- 4 Although females are more numerous, male employees show slightly higher attrition.

Location Strength

- 5 Lagos has the highest employee concentration, making it a key operational center.

Recommendations

Improve Retention in Sales

Introduce staff engagement programs, career growth plans, and workload review.

Strengthen Succession Planning

Prepare for exits in the 50+ age group through mentorship and knowledge transfer.

Regular Satisfaction Reviews

Conduct feedback sessions to identify workplace concerns early.

Review Recruitment Strategy

Replace exits faster in high-risk departments to avoid operational gaps.

Monthly Dashboard Monitoring

Use continuous HR dashboard reviews for faster decision-making and workforce control.

Conclusion

The HR dashboard reveals clear **workforce challenges**, especially in employee attrition and departmental retention.

Focused action in **Sales**, older employee groups, and high-pressure departments will improve workforce stability and reduce turnover costs.

Using **data-driven HR decisions** will help NICON Bank build a stronger, more productive, and sustainable workforce.

Thank You!
